Design for Longevity: Unlocked

Join us for an engaging hands-on workshop that explores how design can shape meaningful experiences across a lifetime.

Rooted in the Design for Longevity (D4L) Unlock Framework, this session invites participants to rethink time as a continuous, evolving dimension—beyond moments, toward decades of impact. Through creative exercises, such as photogrammetry, and collaboration, we'll reimagine longevity-focused services on the MIT campus, emphasizing circularity, continuity, and purposeful evolution in design.

To participate, please complete this short [registration survey](#).

March 6
1pm - 3:30pm
Free with registration

Friday March 6
1–3:30pm
